PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years' hands-on experience building and maintaining production web applications using React, TypeScript, Redux Toolkit, Tailwind, Zustand, and modern frontend tools. Strong experience engineering production systems used by government agencies, fintechs, and enterprise teams.

AWS Certified (CCP & SAA) with proven ability to collaborate across design, backend, DevOps, and product teams. Passionate about building efficient interfaces, driving UI performance, and delivering reliable features end-to-end. I enjoy solving UI problems, simplifying complex flows, and making apps faster and easier to use.

EDUCATION

University of Benin, Nigeria

March 2019 – September 2023

Bachelor of Science, Computer Science.

CORE SKILLS

Frontend: JavaScript (ES6+), React.js, TypeScript, SASS, Tailwind CSS, Redux Toolkit, RTK Query, Next.js, Shadcn, Context API

Version Control & Collaboration: Git, GitHub, GitLab, Bitbucket

State Management: Redux, Context API, Redux Toolkit, Zustand, RTK Query

Web Development Tools: Visual Studio Code, Webpack, Postman, JetBrains

CI/CD & DevOps: Docker, Jenkins, GitHub Actions, AWS Code Pipeline

Database Technologies: MySQL, DynamoDB, Firebase

Cloud Platforms: Amazon Web Services (AWS)

Product & Collaboration: Agile/Scrum, RESTful APIs, Jira, Figma, Prisma, Neon, Shadcn

CONFERENCE/WORKSHOP ATTENDED

- | | |
|---|------|
| • DigiLink: Improving digital capabilities among students | 2023 |
| • DevFestLagos22' | 2022 |
| • Dev Fest Lagos 24' | 2024 |

INDUSTRIAL EXPERIENCE

Nigeria Inter-Bank Settlement Scheme (NIBSS)

June 2025 – Present Frontend Developer

- Worked on the development and optimization of external and internal frontend applications for log searching automation and controlled database access used by over 200+ staff and partner agencies, improving log search automation and reducing manual checks by 40%+
- Took ownership of frontend bugs and fixes, resolving 90% of assigned issues within SLA.
- Wrote and maintained React -TypeScript code for dashboards, forms, tables, role-based access screens, and real-time data views
- Focused on performance optimization and state management using Redux, ensuring smooth data flow and responsiveness across multiple web applications.

Qucoon Limited

May 2024 – June 2025

Frontend Developer

- Built and shipped core features across multiple business-critical apps (CRM, Maker-Checker, Wellness platform) using React, TypeScript, and Redux. These updates improved workflow speed and increased overall user engagement by an estimated **20–30%**.
- Integrated multiple backend services and reduced API-related errors by **~40%** after adding better request validation and response handling.
- Focused on state management through Redux, ensuring smooth data flow and optimizing performance across all components. Played a key role in building responsive UI/UX designs, ensuring accessibility and seamless user experience
- Worked closely with backend engineers to integrate complex API services for secure data exchange and processing, ensuring seamless operation between frontend and backend systems.

ipNX Nigeria Limited

March – November 2022

Application Development Support

- Maintained documentations related to applications, including user manuals troubleshooting guides and Standard Operating Procedures (SOP)
- Helped resolve 100+ support tickets by identifying bugs and working with the dev team on fixes.
- Improved documentation clarity, decreasing repeat user issues by 15–20%.
- Participated and performed testing and quality assurance activities before deployment.
- Managed and resolved incidents related to applications and prioritizing them based on severity.
- Took part with the team of developers with the routine maintenance of applications which sometimes included applying patches and updates

PROJECTS

CHOOSE LIFE WELLNESS

Developed a fully responsive health and wellness platform focused on fitness tracking, meal planning, and mental wellness resources. Utilized React and Redux to manage user interactions, implementing an intuitive interface that adapts seamlessly across devices. Integrated backend APIs to provide dynamic content delivery, ensuring a personalized experience for users.

QOONITY

Built a dynamic frontend for an application platform that allows users to input entities, attributes, and other necessary elements to generate customized Kotlin code. Used React to create an interactive and user-friendly interface that enables seamless user input and code generation. Implemented functionality to allow users to download the generated Kotlin code directly from the platform, enhancing the development workflow.

NIBBS CRM

Developed a robust CRM solution for NIBSS to optimize customer relationship processes and improve engagement with real-time data updates. Integrated backend systems like **Teams** for meetings to support seamless customer data management and real-time analytics.

AI RESUME ANALYZER

Developed an **AI-powered resume analysis tool** that scans and evaluates resumes based on job descriptions, providing insights on keyword relevance and skill matching. Built the application using **React** for the frontend and integrated AI-based algorithms to assess the quality of resumes and provide feedback to candidates for optimization. Ensured smooth user experience with intuitive form design and real-time results, enhancing the recruitment process for hiring managers and job applicants.

TRAVEL BUDDY

Developed a *Travel Planner* application to help users plan trips, find destinations, and connect with fellow travelers based on interests and destinations. Utilized *NextJs* and *NextAuth* to manage user data, interactions and authentication, creating an interactive and seamless experience. Integrated *Google Maps API* to provide travel routes, destination suggestions, and itinerary management, enabling users to plan their trips efficiently.

INVENTORY MANAGEMENT SYSTEM (IMS)

Deployed an outsourced inventory management system on a *Linux server*. Installed all necessary software dependencies using *Bash scripts*. Implemented security measures, including configuring firewalls, applying access controls, and enabling encryption where required.

VERIZON CLOUD PLATFORM JOB SIMULATION ON FORAGE 2023

October

- Completed a Job Simulation involving a hypothetical new VPN product for Verizon's Cloud Computing team
- Used command line Python to test whether Verizon's VPN met the cloud native traits which includes redundancy, resilience and least-privilege
- Researched approaches to achieve application security and communicated insights in a PowerPoint Presentation

AWARDS & HONORS

- **MTN Science and Technology Scholarship** 2021
It is a scholarship award usually given to students in their 2nd year in the university, each recipient receives an annual payment of N200,000 from when they qualify till graduation

- **Byinks Foundation Scholarship**

A scholarship for undergraduates in notable universities across the country, that assist in the payment of tuition fees from when they qualify till graduation

2019
- **AWS Certified Cloud Practitioner**

A prestigious and globally recognized credentials that validates a comprehensive understanding of Cloud Computing fundamentals and the Amazon Web Service (AWS) ecosystem.

2024
- **AWS Solutions Architect - Associate**

A prestigious and globally recognized credentials that validates a comprehensive understanding of Cloud Computing fundamentals and the Amazon Web Service (AWS) ecosystem.

2025
- **Certificate of Meritorious Participation in the Cowbellpedia National Mathematics Competition**

A recognition certificate presented to students with excellent performance in the competition

2015
